Subject: Re: Entry Level Machinists

Attachments:

John,

Hope all is well. I wanted to pass along some information on some openings in the Fremont area. We have a client that is seeking day and swing shift shop assistants to deburr and clean parts, cut and load material, and support the machinists. This is a great entry-level job to get into the machining industry. They are also looking for skilled vertical mill machinists with strong setup and programming skills .

Any help would be appreciated. Just have them call my cell or send me an e-mail.

Thanks

Best Regards,
